

Oyebanji Adegboyega

AI Security Engineer • Multi-Agent Systems • Ethical Alignment

Oyebanjiadegboyee@gmail.com github.com/GBOYEE gboyee.github.io

Nigeria (Remote)

Summary

AI-Native Systems Builder specializing in production-grade AI security infrastructure, multi-agent orchestration, and ethical alignment. Proven ability to ship end-to-end tooling for vulnerability scanning, RLHF pipelines, and autonomous agents. Combines deep backend expertise with full-stack capabilities to deliver complete, auditable AI systems.

Skills

Backend AI

- Python (FastAPI)
- Redis
- Docker
- Streamlit
- Solana/Web3
- RLHF Alignment
- Vulnerability Scanning
- Multi-Agent Systems
- Ethical AI Auditing

Frontend

- HTML5 / CSS3
- TypeScript
- React / Next.js
- Tailwind CSS

Platforms & Tools

- GitHub Actions
- Linux
- Ollama
- OpenRouter

- Kubernetes (xander-operator)

Selected Projects

xander-operator

AI operator with browse, fill, research, and vector memory — a building block for autonomous agents.

Python FastAPI Redis

[GitHub](#)

xander-hive-framework

Multi-agent AI orchestration framework with RLHF-style loops for continuous improvement.

Python Docker Streamlit

[GitHub](#)

HiveSec-Ecosystem-Hub

Streamlit dashboard for multi-agent security operations: vulnerability scanning, alignment checks, and audit trails.

Streamlit Python Redis

[GitHub](#)

aiopsx

Production-ready toolkit for deploying, monitoring, and securing AI agents at scale.

FastAPI Docker Redis

[GitHub](#)

openclaw

Open-source multi-agent platform with secure hive messaging, self-healing, and production-grade orchestration.

Python Redis OpenRouter

[GitHub](#)

auto-sme

Automated subject-matter-expert pipeline for AI-assisted content generation and validation.

Python FastAPI Streamlit

[GitHub](#)

Experience & Education

(Available upon request — focused on AI Engineering, Security, and Multi-Agent Systems. Open to full-time remote roles.)
